

The Indianapolis Radio Club Newsletter

Founded 1914

December 2019 Newsletter

Upcoming Meetings:

January 10: Test equipment demos.

February 14: Annual CES show report with Dave Arland.

March 13: Public Service Panel

Highlights from the December Meeting:

This was the club's Holiday party gathering.

There were just under 40 in attendance at this casual social event.

From all reports (unfortunately I had a previous commitment, and was unable to attend), the evening was a huge success, thanks in great part to the party organization from Jeff, N9NIC, with help from Jim, K9RU, Dave, K9RTT, and Mark, W9MGB. Dave provided his famous, award-winning chili, which was a great hit, with none left by the end of the evening. There also were veggie and meat trays, as well as a good selection of desserts that were carried in, and they all got sampled. A wide variety of Radio related video clips were shown, ranging from World War II era, to ARRL videos, to Three Stooges. There were 4 teams led by the four longest serving club members that played Ham Radio based Jeopardy. The Final Jeopardy question was a tricky one, and will probably be discussed at the January meeting. Among the winners of the various prizes from the

night were Ron, WB9DKL (Yaesu FTM-100DR), and Dennis, KC9SKA (\$54 cash). All in all, the evening was a great success, and will probably become an annual event.

Ham Radio News:

IRC 2020 DUES PAYABLE NOW

Indianapolis Radio Club Treasurer, Mark Burke, W9MGB, wants to make sure everyone is aware that 2020 dues are now being accepted. Annual dues are still only \$20! Mark will be available to accept dues payments at the January 10 meeting. Dues checks can also be mailed to Mark at 6347 Green Leaves Road , Indianapolis, Indiana 46220.

Contact Mark with any dues questions at mark@mgburke.com

SOLAR CYCLE 24/25 UPDATE

The NOAA/NASA-co-chaired international Solar Cycle Prediction Panel has released its latest forecast for Solar Cycle 25. The panel's consensus calls for a peak in July 2025 (± 8 months), with a smoothed sunspot number of 115. The panel agreed that Cycle 25 will be of average intensity and similar to Cycle 24. The panel additionally concurred that the solar minimum between Cycles 24 and 25 will occur in April 2020 (± 6 months). If the solar minimum prediction is correct, this would make Solar Cycle 24 the seventh longest on record at 11.4 years. In its preliminary forecast released last April, the scientists on the panel forecast that Solar Cycle 25 would likely be weak, much like the current Cycle 24.

SPECIAL EVENT PLANNED TO MARK BEETHOVEN'S 250TH

German special event station DL250BTHVN will be active between December 16, 2019, and December 17, 2020, to honor the 250th anniversary of the birth of famed composer Ludwig van Beethoven. The Beethoven anniversary year will take place under the auspices of Germany's Federal President Frank-Walter Steinmeier. Beethoven was born

in December 1770 in Bonn, Germany, and lived there for the first 22 years of his life. The anniversary event is aimed in part at highlighting Beethoven's extensive oeuvre as a composer and to boost Bonn's reputation as a "Beethoven city." QSL via direct or by the bureau.

2020 HENDRICKS COUNTY TRAINING CLASSES SCHEDULED

The classes are sponsored by the HCARS club and will be held at the Hendricks Co. Senior Center, 1201 Sycamore Lane in Danville (behind the Danville Hospital).

Classes start on Wednesday, January 29, and run every Wednesday evening through March 18. Classes will meet from 7pm till 9pm.

There will be testing on March 18.

These Technician and General classes will be for those who wish to obtain an amateur radio license or to upgrade from their existing license.

Nov 14
Dec 12

THE FUTURE OF OUR HOBBY

I'm doing something here that I haven't done before, in writing an "editorial", if you will. Often, we hear or read about what can be done to get "young" people (defined for this as those under 60) interested in becoming hams. What prompted me to write this was a thread on an email reflector, where one of the posters proudly stated that he refuses to own a cell phone, citing as one part of his reasoning that "the government can't track me". In my opinion, thinking such as this only serves to reinforce some of the media portrayals of hams as being recluses that wear tin-foil hats to keep the government from reading their minds (mine would be a short story). We, as hams have to realize that if we have any serious intent to recruit others into our hobby, we need to shed that perception. Let's face it, the world in which we live is one that is COMPLETELY CONNECTED via the internet. Granted, one of the key factors that makes our hobby more than "just a hobby" is the fact that we can get our message through with or without infrastructure support, such as the internet. That's a good place to start if we're talking with "preppers" who don't want to rely on anything other than their own resources. However, if we're talking to the general public, especially the younger public, we need to embrace our networked world, rather than shun it. When the average 16 year old can text or talk to someone across the country, or on the other side of the world for that matter, with a device in their pocket, I think a good way to relate is with the internet reliant methods (EchoLink, IRLP, digital voice modes) where we can contact folks a long way off with just a handheld radio. Once we get their attention, then we can talk about the many other aspects of our hobby that keep us interested. Don't get me wrong, if you choose to not use a cell phone, that's fine. Just don't make that your basis for trying to "sell" someone on our hobby.

At least, that's the way I see it, KJ9B.

If anyone has any items for the newsletter, please send them to Ken Bandy at kj9b@arrrl.net

Signals from the Past:

From the December, 1959 *Amachewer*:

The 1959 Hobby Show gave the IRC an opportunity to present a top flight club project with their exhibit of “Modern Amateur Radio”.

The steady stream of visitors and the many discussions and explanations on ham activities, licensing, operation, our club etc. indicated the real interest of the general public.

Upcoming Area Radio Events:

- February 8, 2020, 8:00 - 1:00: Hendricks County Hamfest at Hendricks County Fairgrounds.
- March 14, 2020, 8:00 - 12:00: Wabash Valley Amateur Radio Association Hamfest and Computer Expo at Clay County 4-H Grounds. Go to https://www.w9uuu.org/hamfest/hamfest_2020.pdf for more info.
