

Section Emergency Coordinator and also served as Marion County, Indiana, Emergency Coordinator. He is an ARRL VEC volunteer examiner.

Carlson served both as Vice Director and then Director of the Central Division for a total of 12 years. He said his resignation stemmed from "an intractable conflict" between Board and family obligations that would impinge upon his travel on behalf of ARRL. "It would be impossible to maintain the level of in-person engagement with the Members that I believe is essential," Carlson said.

Carlson said his "most challenging and rewarding experiences" include the 11 years as Chair of the Electromagnetic Compatibility Committee (EMC) and his recently concluded term as the chair of the ARRL CEO Search Committee. He will continue to chair the EMC.

ARRL UNVEILS WEB-BASED CALCULATOR FOR RF EXPOSURE

The FCC has adopted guidelines and procedures for evaluating environmental effects of RF emissions. Under the new FCC rules, some amateurs need to perform routine station evaluations to ensure that their stations comply with the RF exposure rules. This can be as simple as running an online calculator to determine the minimum safe distance between any part of your antenna and areas where people might be exposed to RF energy from your station. Although amateurs can make measurements of their stations, evaluations can also be done by calculation.

The ARRL now provides a web based calculator for this purpose. It can be found at <http://arrl.org/rf-exposure-calculator> The on-line calculator is fairly straightforward to use, and offers the option to print out results to keep with your station records.

BOUVET ISLANDS DXPEDITION GOOD NEWS/BAD NEWS

The 3Y0J team has "been working hard with the negotiations for weeks and months", reports LA7GIA, Ken. The team has looked at "several vessels and turned down expensive motoryachts". They are going with the sailboat Marama (<https://maramaexpeditions.com/en/sailboat-marama/>), a 101 foot Oceanic Ketch, is "one of the best in its class with a dedicated and experienced crew". The Marama is often found touring the North West Passage, and around Antarctica and South Georgia. Ken says, "Many of you will also have the possibility to see this beauty when she visits New

York, California etc. on its way to 3Y0J port of departure". From the moment they activated the team's website (<https://www.3y0j.no/>) "fundraising had a rocket launch with donations flowing in".

With the realization that there were 3 DXpedition teams scheduled to go to Bouvet in three consecutive years, the Intrepid DX Group, which was scheduled for early 2023, has decided to drop their plans to visit Bouvet. According to a press release from the Intrepid DX Group, they "plan to activate a different rare and much needed entity in January/February 2023. That is now our focus."

NEW FCC FEES UNLIKELY TO GO INTO EFFECT UNTIL 2022

The schedule of FCC amateur radio application fees likely will not go into effect before 2022. FCC staff confirmed during a recent virtual meeting with Volunteer Examiner Coordinators (VECs) that the agency is still working on the necessary changes to the Universal Licensing System (ULS) software and other processes and procedures that must be in place before it starts collecting fees from amateur applicants. Earlier this year, the FCC said it would not start collecting fees from amateur applicants before this summer. The new estimate is that the fees won't go into effect until early next year.

Once it's effective, the \$35 application fee will apply to new, modification (upgrade and sequential call sign change), renewal, and vanity call sign applications. All fees will be per application. Administrative update applications, such as those to change a licensee's name, mailing, or email address, will be exempt from fees. ARRL VEC manager Maria Somma, AB1FM, said Volunteer Examiner (VE) teams will not face the burden of collecting the \$35 fee.

Signals from the Past:

From the September, 2011 *AmaChewer*:

From Jim Rinehart, K9RU:

Morgan Manufacturing, located in Martinsville, Indiana, is now offering 100 of the most popular Industrial Communications Engineers, LTD (ICE) products including lightning arrestors, bandpass filters and AC line protection devices. Bob Koss, W9ETA, the owner

of Morgan Manufacturing and brother of the late Mike Koss, the founder of ICE, was a subcontractor manufacturing many of the ICE products and worked with Mike on new product development. ICE products are known for their quality and performance and Morgan Manufacturing will continue to live up to these expectations. Check out the online catalog: <http://www.morganmfg.us>

Upcoming Area Radio Events:

- Ft. Wayne Radio Club Tailgate Hamfest: August 20, on the campus of Purdue Ft. Wayne. 6:00 pm Go to <https://fwrc.info/2021/07/31/new-venue-for-annual-tailgate-hamfest/> for more info.
- Clark County ARC 2nd Annual Swap Meet: August 21, 7 am to 2 pm at the American Legion in New Albany, IN
- North Central Indiana Hamfest: August 28, 9 am to 2 pm at the Miami County 4-H Fairgrounds. Go to <http://www.nci-hamfest.net/2021.pdf> for more info.
- Mid State ARC Tailgate: September 11, at the Johnson Co. Prosecutors parking lot, 1 Caisson Dr, Franklin, IN 8 AM - 12 PM
- Tippecanoe County Hamfest: September 11, at the Tippecanoe County 4H Fairgrounds, 1406 Teal Road - Lafayette, IN 8:00 am - 2:00 pm
- W9DXCC Convention: Sept. 10 (DX and Contest Universities) and Sept. 11 (Convention and Banquet), in Naperville, IL. Go to <https://w9dxcc.com/> for more details.
